5D HIFU

One Machine, Multi-Functional

Only need to replace the handle, you can upgrade the product function at any time.

How it works

HIFU-powered transducers deliver concentrated waves of ultrasound into multiple layers of skin and body tissues without making direct contact with surrounding areas.

Transferring stabilized temperatures of 65~75°C into the targeted zones, the SMASFOCUS V aims to induce a process of neocollagenesis in the face while tightening body tissues for contouring purposes

FOR LIFTING & TIGHTENING

1 The dermis layer of the skin naturally synthesizes less collagen over the course of time.

2 Focused ultrasound waves deliver energy directly within the skin layer causing a shrinking effect.

3 Stimulated by the focused energy, skin collagen starts to regenerate.

4 Through the regeneration of collagen, wrinkles are eliminated in the process of both firming and tightening the skin.

FOR SLIMMING & CONTOURING

1 Fat cells and cellulite is formed within the body.

2 The SMASFOCUS V energy destroys the fat cells that have been targeted.

3 As a natural healing response of the body the cells regenerate joining together to fill the gap.

4 In result, the layer of fat naturally exits the body delivering a smooth, contoured body line.
